2017

(1st Semester)

ECONOMICS

Paper No.: ECO-101

(Microeconomics-I)

Full Marks: 70 Pass Marks: 45%

Time: 3 hours

(PART : B-DESCRIPTIVE)

(Marks: 45)

The figures in the margin indicate full marks for the questions

 (a) "Economics is the science which studies human behaviour as a relationship between ends and scarce means which have alternative uses." Discuss.

Or

- (b) Discuss the methods of analysis used in economics.
- (a) Critically examine the concept of consumer's surplus.

(Turn Over)

9

9

Or

- (b) Explain the properties of indifference curves and assess their importance in economic analysis. 5+4=9
- (a) Explain the laws of returns to scale and enumerate the factors that cause decreasing returns to scale. 6+3=9

Or

- (b) Discuss the Cobb-Douglas production function.
- (a) Distinguish between Average Cost and Marginal Cost. Discuss the significance of this distinction in the analysis of a firm's equilibrium.

Or

- (b) Analyze the difference between real and pecuniary economies of scale.
- (a) Define welfare economics and discuss the problems in measuring social welfare.

Or

(b) Critically explain the growth of GNP and cardinalist criteria of social welfare.

	(1st Semester)	
	ECONOMICS	
	Paper No.: ECO-101	
	(Microeconomics—I)	
	(PART : A—OBJECTIVE)	
	(Marks : 25)	
The fig	ures in the margin indicate full marks for th	e questions
	SECTION—I	
	(Marks : 15)	
A. Put	a Tick (1) mark against the correct ans	wer: 1×10=10
1.	The author of The Wealth of Nations wa	ıs
	(a) Alfred Marshall ()	
	(b) Lionel Robbins ()	
e e	(c) Adam Smith ()	
	(d) David Ricardo ()	

2.	When the demand changes in the same proportion to the change in price, it is called											
	(a)	perfectly inelastic ()										
	(b)	perfectly elastic ()										
	(c)	unitary elastic ()										
	(d)	unitary inelastic ()										
3.	The	Engel curve for a Giffen goods is										
	(a)	negatively sloped ()										
	(b)	positively sloped ()										
	(c)	vertical ()										
	(d)	horizontal ()										
4.	effe	Slutskian method of decompounding price et into income effect and substitution effect alled										
	(a)	cost-difference method ()										
	(b)	compensating variation in income method ()										
	(c)	price-consumption method ()										
	(d)	None of the above ()										

5.	The law	law of vari	able	e prop	orti	on i	s a	lso	called	the
	(a)	non-propo	rtio	nal re	turi	ns		()	
	(b)	proportion	al r	eturn	S	()		
	(c)	increasing	ret	urns		()			
	(d)	diminishin	g re	eturns		()		
6.	As	production	inc	reases	s, va	arial	ble	cos	st	
	(a)	increases	in t	otal		()			
	(b)	decreases	in t	otal		()			
	(c)	remains u	nch	anged	Ĺ	()		
	(d)	None of th	e a	bove		()			
7.		marginal o						s th	ne ave	rage
	(a)	maximum		()					
	(b)	minimum		()					
	(c)	rising	()						
	(d)	falling	()						

8.	A in	ced cos	t 18	one						
	(a)	which	is v	ariable	per	r uni	t	()	
	(b)	which	is s	emi-va	riab	le po	r un	it	(9
	(c)	which	is fi	xed pe	r u	nit	()		
	(d)	None (of th	e abov	е	()			
9.	Nor	mative	econ	nomics	is	conc	ernec	l with	n	
	(a)	what	is'	()					
	(b)	what	sho	uld be'	of	thing	ţs	()	
	(c)	value	jude	ment		()			
	(d)	All of	the	above		()			
10.	Pro	f. Graf	f ha	s distir	ngu	ished	E			
	(a)	0	()						
	(b)	1	()						
	(c)	2	()						
	(d)	3	()						
		ncept(s			elfa	ire.				

B.	Indicate	True	(T)	or	False	(F)	by	a	Tick	(1)	mark	:
												$1 \times 5 = 5$

1. Inferior goods have negative income elasticity.

(T / F)

Microeconomics is the study of the nature and the relationship among aggregates like national income, general price level, etc.

(T / F)

Consumption is the beginning and end of all economic activities.

(T/F)

 The long-run average cost curve is also known as planning curve.

(T / F)

Pareto's welfare theory avoids ordinal measurement.

(T / F)

B.	Indicate	True	(T)	or	False	(F)	by	a	Tick	(1)	mark	:
												1×5=5

Inferior goods have negative income elasticity.

(T / F)

Microeconomics is the study of the nature and the relationship among aggregates like national income, general price level, etc.

(T / F)

Consumption is the beginning and end of all economic activities.

(T / F)

 The long-run average cost curve is also known as planning curve.

(T + F)

Pareto's welfare theory avoids ordinal measurement.

(T / F)

SECTION-II

(Marks: 10)

- C. Write short notes on any five of the following: 2×5=10
 - 1. Concept of equilibrium

2. Basic economic problems

3. Difference between cardinal and ordinal utility

4. Substitution effect

Difference between the short-run and long-run period in the study of cost of production 6. Concept of opportunity cost

7. Assumption of Pareto's criteria

Difference between individual welfare and social welfare
